G&G ARMAMENT
AIRSOFT G&G & ACCESSORIES

THIS IS PAI

G&G Armament patented Hop-Up chamber design elaboration

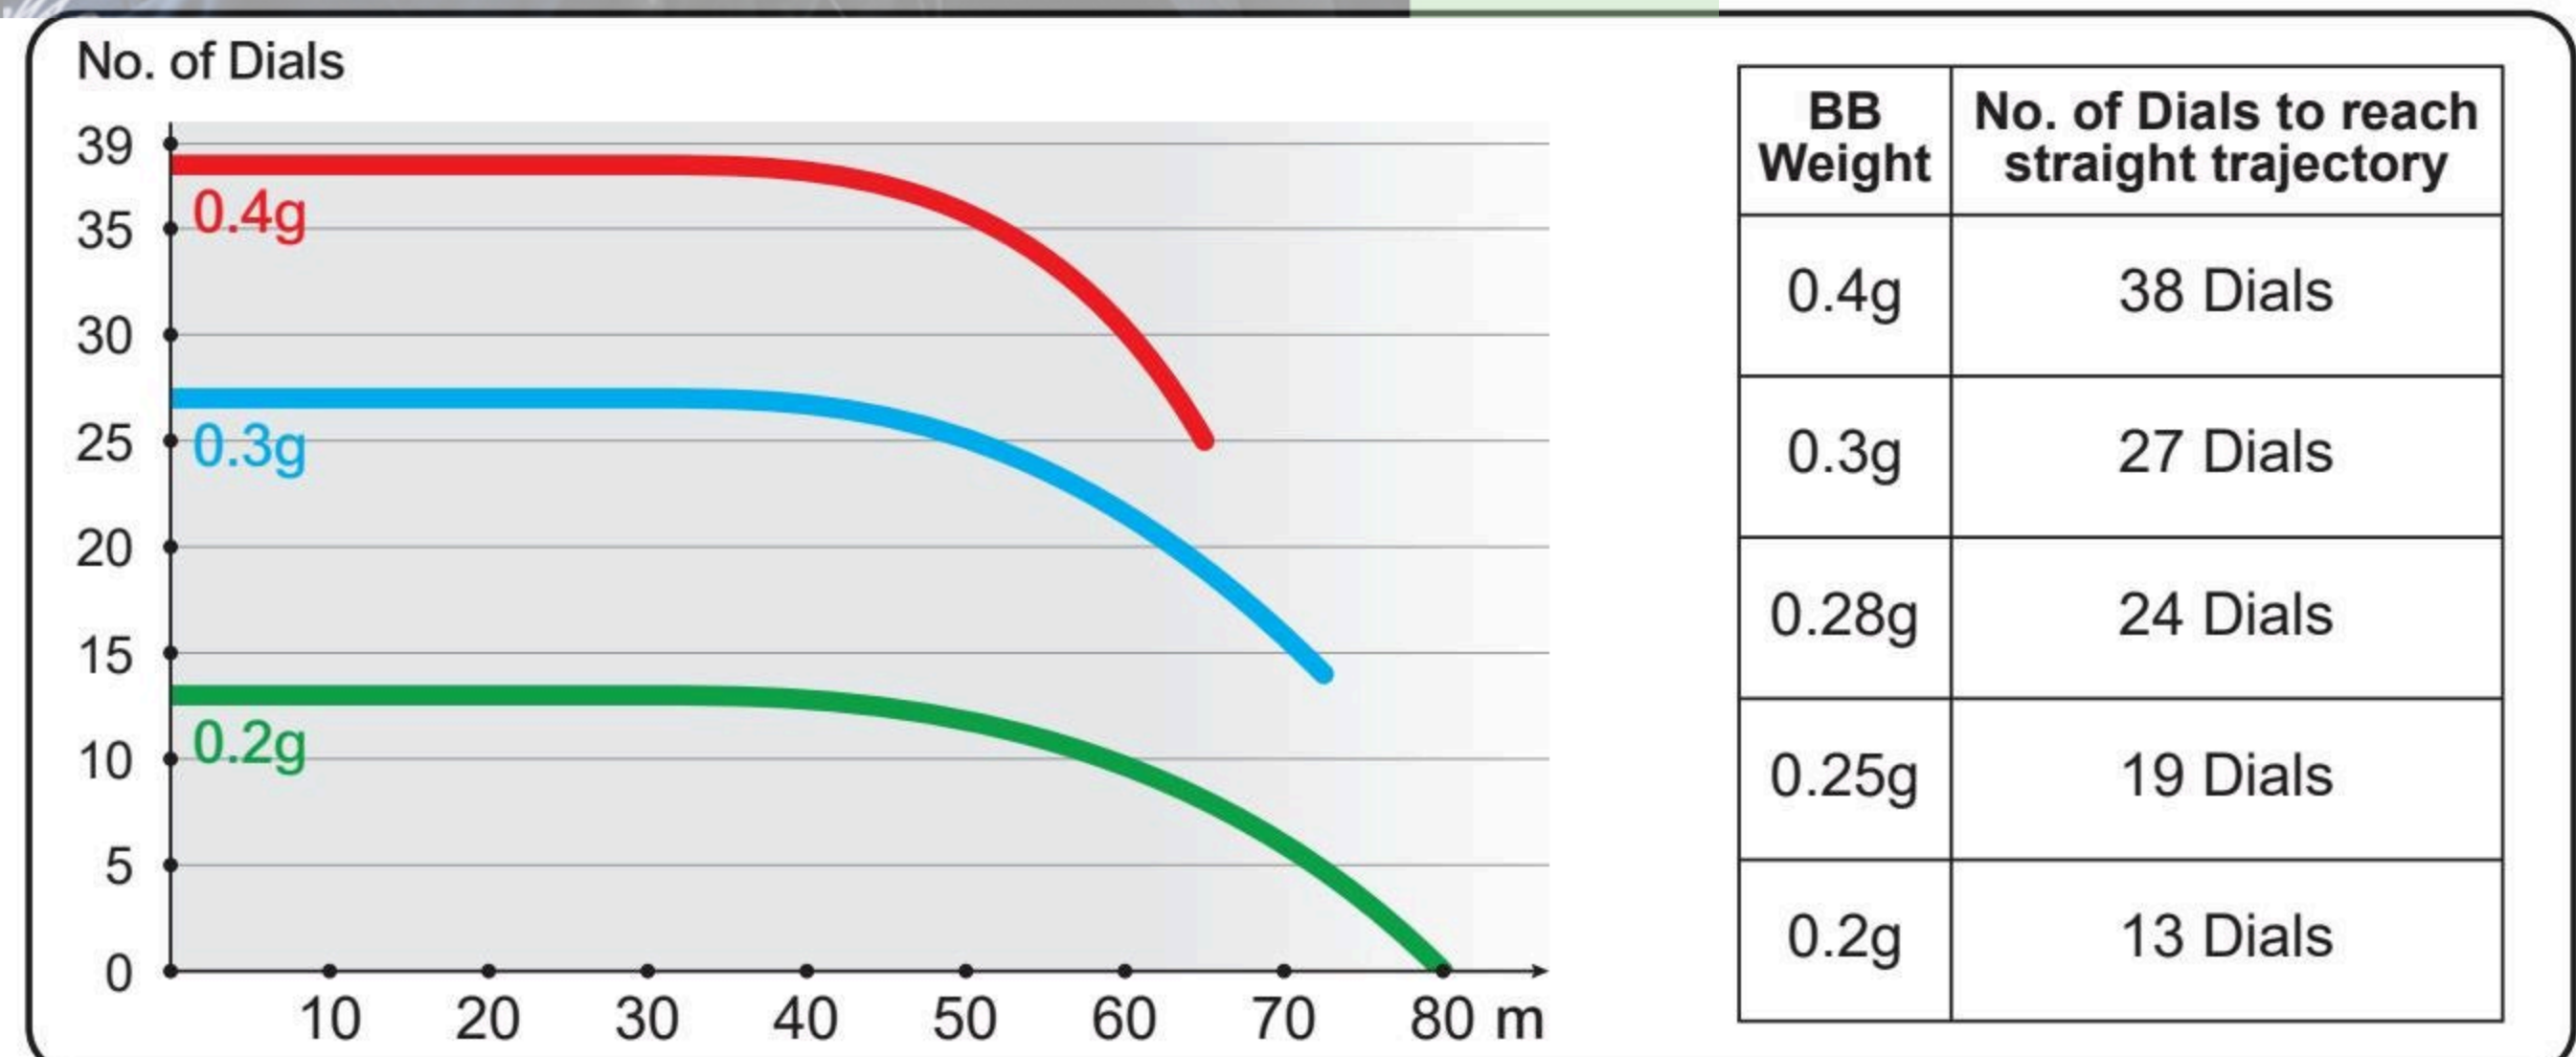

The Hop-Up Chamber is the core component of the airsoft gun for ballistic accuracy and range. The latest patented Hop-Up Chamber launched by G&G Armament this year is different from any other product on the market and can be used with various weights of BBs, even up to 0.4g, and still achieve optimal trajectory and range. The main visual design of this patented Hop-Up Chamber is pictured below:

The central graphic depicts the core parts of the patented Hop-Up Chamber. The planetary icons (Sun, Saturn, Moon) represent the mystery of planetary movement. The different masses of each celestial mass reflect the range of BB weights, while their varying orbital speeds relate to the BB rotation speeds at different masses after passing through the Hop-Up chamber. On the bottom of the outer ring, **P** is the initial for Precision, and the unit of this number 0.019 describes the distance in millimeters that the top-down piece moves with each dial adjustment. This is just one example of how the core parts are very precise with finely tuned adjustment features. **A** is the initial for Accuracy, and the number 39 is the total number of dial adjustments that can be operated, showing the most accurate ballistics can be achieved by fine tuning. **I** is the initial for Innovation, and the number 0.74 represents the total travel distance in millimeters (0.019mm x 39 dials), which demonstrates how this innovative design operates through very precise parts with fine tuning features to achieve the optimal performance.

The combination of the three initials is **PAI**, similar to the circumference ratio, recalls how this design is related to the round shaped objects (BB pellets) and demonstrates the concept and function of this patent.

***Only perfect roundness with 5.95mm diameter BB pellets paired with PAI patented Hop-Up chamber can achieve the best range and accuracy, choose G&G high quality BBs for the optimal performance.

STP45 PRO SERIES

STAY TUNED FOR MORE UPCOMING ACCESSORIES.

8 CHALLENGE MODES

Different challenge mode can only be selected when 2 or more ETTs are connected.

1) Competition Mode

After Mode 1 selected, press the [Start Button] to start the challenge. In this mode, ETT will stand-by with green lights on. When the ETT received the shot, lights will turn red and stay in red until reset by pressing the [Start button] again. This mode is suggested in "quick draw" style competition.

2) Versus Mode

After Mode 2 selected, press the [Start Button] to start the challenge. In this mode, ETT will flash in green lights and count down 5 seconds by flashing once per second. After 5 seconds passed, the ETT will stay in green and ready to receive the shot. After ETT being shot, the lights will turn red and stay in red until reset by pressing the [Start Button] again. This mode is suggested in "showdown" style competition.

3) Search & Destroy Mode

After Mode 3 selected, press the [Start Button] to start the challenge. In this mode, ETT will stay in green lights and emit sounds. The sound will stop and ETT turns red after received a shot then switch on another ETT in random order if connected with others. This mode is suggested to set up with multiple ETTs and place them in random locations for shooters to find the ETTs.

4) Practice Mode

After Mode 4 selected, press the [Start Button] to start the challenge. In this mode, ETT will stay in green lights and ready to receive shots. The ETT will turn red and emit one sound after received a shot. If the range is set up with multiple ETTs, the last ETT will flash in red three times and emit a sound after received a shot to signal this challenge is over. This mode is suggested in any style of competition when shooters can easily spot the ETT.

5) Random Mode

After Mode 5 selected, press the [Start Button] to start the challenge. In this mode, ETT will stay in green lights and ready to receive shots. The ETT will turn red after received a shot and one of the other ETTs will light up in random order. If the ETT has not receive any shot under 1.5 seconds, then lights off and one of the other ETTs will light up in random order. When the last ETT received a shot, then it will flash red three times and turns off. This mode is suggested in any style of competition when shooters can easily spot the ETT.

6) Hostage Rescue Mode

After Mode 6 selected, press the [Start Button] to start the challenge. In this mode, ETT will change between green and red lights within 1.5 seconds. When ETT received a shot under green lights, it will emit a sound then turns off, but when it received a shot under red lights, it will stays in red without emit any sound. If ETT was connected with others, then the last ETT received a shot under green light will flash three times and the challenge is over. To start another run, press [Start Button] again to reset the game. This mode is suggested in "hostage scenario simulation" style competition.

7) Time Bomb Mode

After Mode 7 selected, press the [Start Button] to start the challenge. In this mode, ETT will change from green to red lights then turns off after received a shot, then randomly switch on another ETT if connected with others. If any ETT has not received a shot within 3 seconds, then ETT will turn red and stays in red to signal this challenge is over, until reset by pressing [Start Button] again. This mode is suggested in "extreme time limit" style competition.

8) Twins Mode

After Mode 8 selected, press the [Start Button] to start the challenge. In this mode, Random two ETTs will stay in green lights and ready to receive shots. These two ETTs must receive a shot under 1.5 seconds or they will switch to any other two ETTs in random order. When the last ETT received a shot, then it will flash three times with red lights to signal this challenge is over. This mode is suggested in any style of competition if there are two or more shooters.

October 2023

4th WORLD CUP CQB SHOOTING COMPETITION

WORLD CUP EXTREME SHOOTING COMPETITION is organized by G&G Armament and held in Taiwan. As the largest international shooting competition, G&G has been promoting the competition around the world since 2012.

70 competitors from 25 different countries qualified for the third World Cup competition in 2019, including USA, Canada, Chile, Brazil, Mexico, Bolivia, Colombia, UK, France, Germany, Spain, Poland, Romania, Switzerland, Netherlands, Finland, Italy, Denmark, Sweden, Czech Republic, Israel, New Zealand, Hong Kong, Japan and Taiwan.

The 4th World Cup Final successfully completed in October 2023 in Taiwan with total of 34 teams from 26 different countries. We are deeply appreciate the support from the enthusiasts and contestants, we could not have done it without you all!
